

Champagne Valley Resort

CHAMPAGNE VALLEY RESORT

KEEPING YOU AND OUR STAFF SAFE
DURING COVID-19

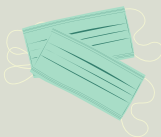

We are by now all aware of COVID-19 and the affect it has had on the entire world! This has meant that we as a resort have had to put in certain protocols in order to protect YOU and our staff during this time!

Please practice social distancing where possible, with guests outside of your unit.

Please wash your hands like you have just sliced jalapenos and you now need to remove your contacts.

We know they are a pain, but for your protection and ours please wear your mask.

STERILIZING

Before occupation, all chalets will be sanitized using a professional fogger to sterilize and disinfect the entire unit. Disinfection and sterilization of all keys will be done before being handed over to you.

NO-CONTACT THERMOMETER

As required by the Health Department, every individual entering the Resort is required to have their temperature taken. We have no-contact thermometers which will be used throughout the day, for both guests and staff.

PPE's

A minimum of three reusable MASKS will be issued to all our staff which they will wear as per the Health Department regulations.

HEALTH DECLARATION

Before entering the property, all individuals will be required to complete a questionnaire regarding the state of their health and well-being. This document will be retained for record purposes, in the event individuals need to be reached for coronavirus contact tracing
